

# Leaving no one behind?

Ugandan citizens' views and experiences on water sanitation and hygiene

*Kampala, Uganda*

# Preview

- Finite resource Vs population growth
- Question of Human capital development?

## Findings:

Leaving no one behind? Ugandan citizens' views and experiences on water sanitation and hygiene

- Sauti Za Wananchi methodology

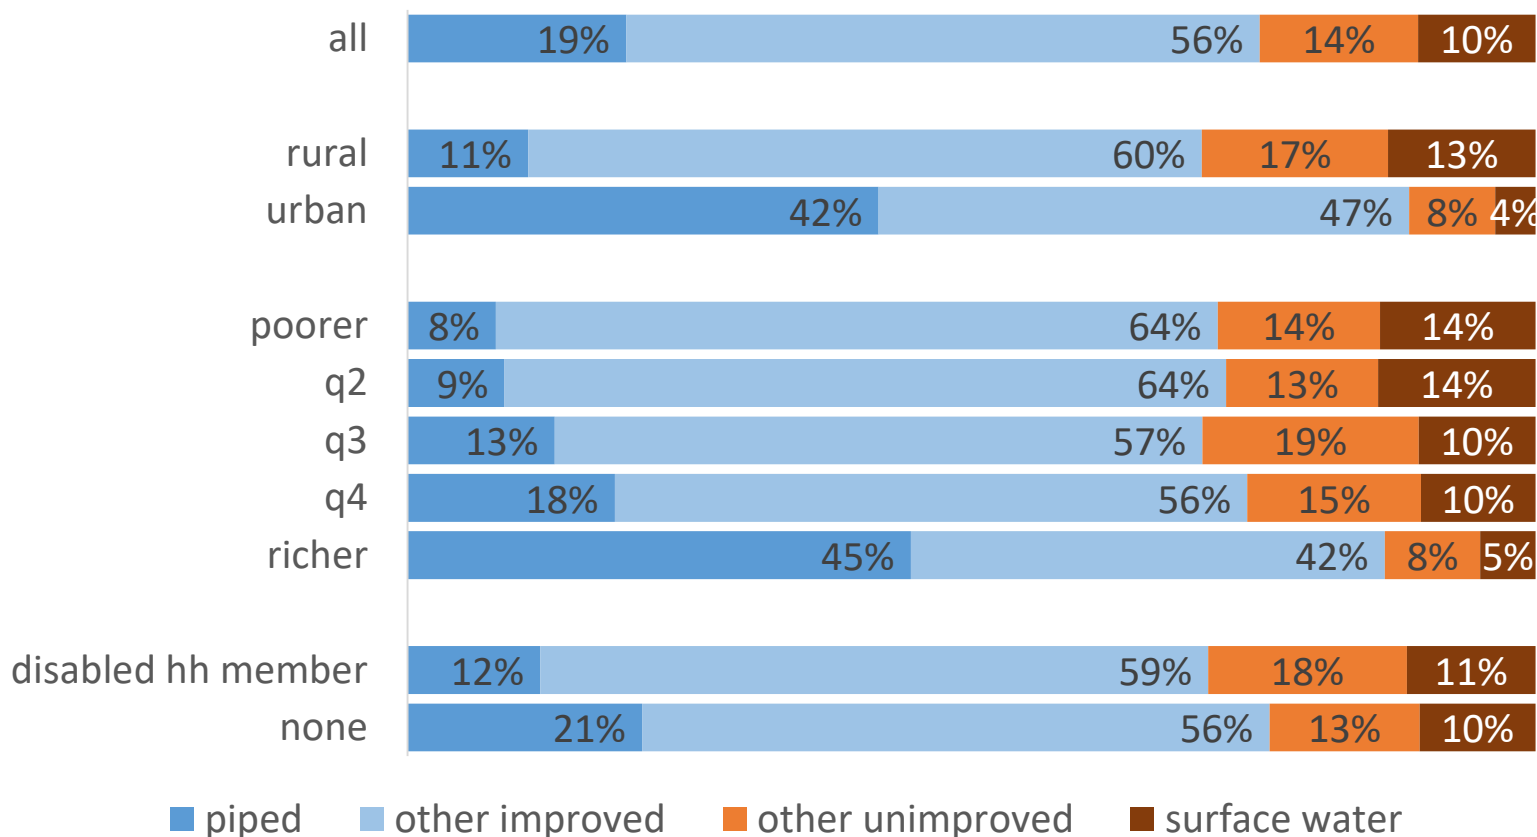

What source? How far is the source? Who collects water?

# Insight 1. 75% households access water from an improved source, urban and wealthier households are better off

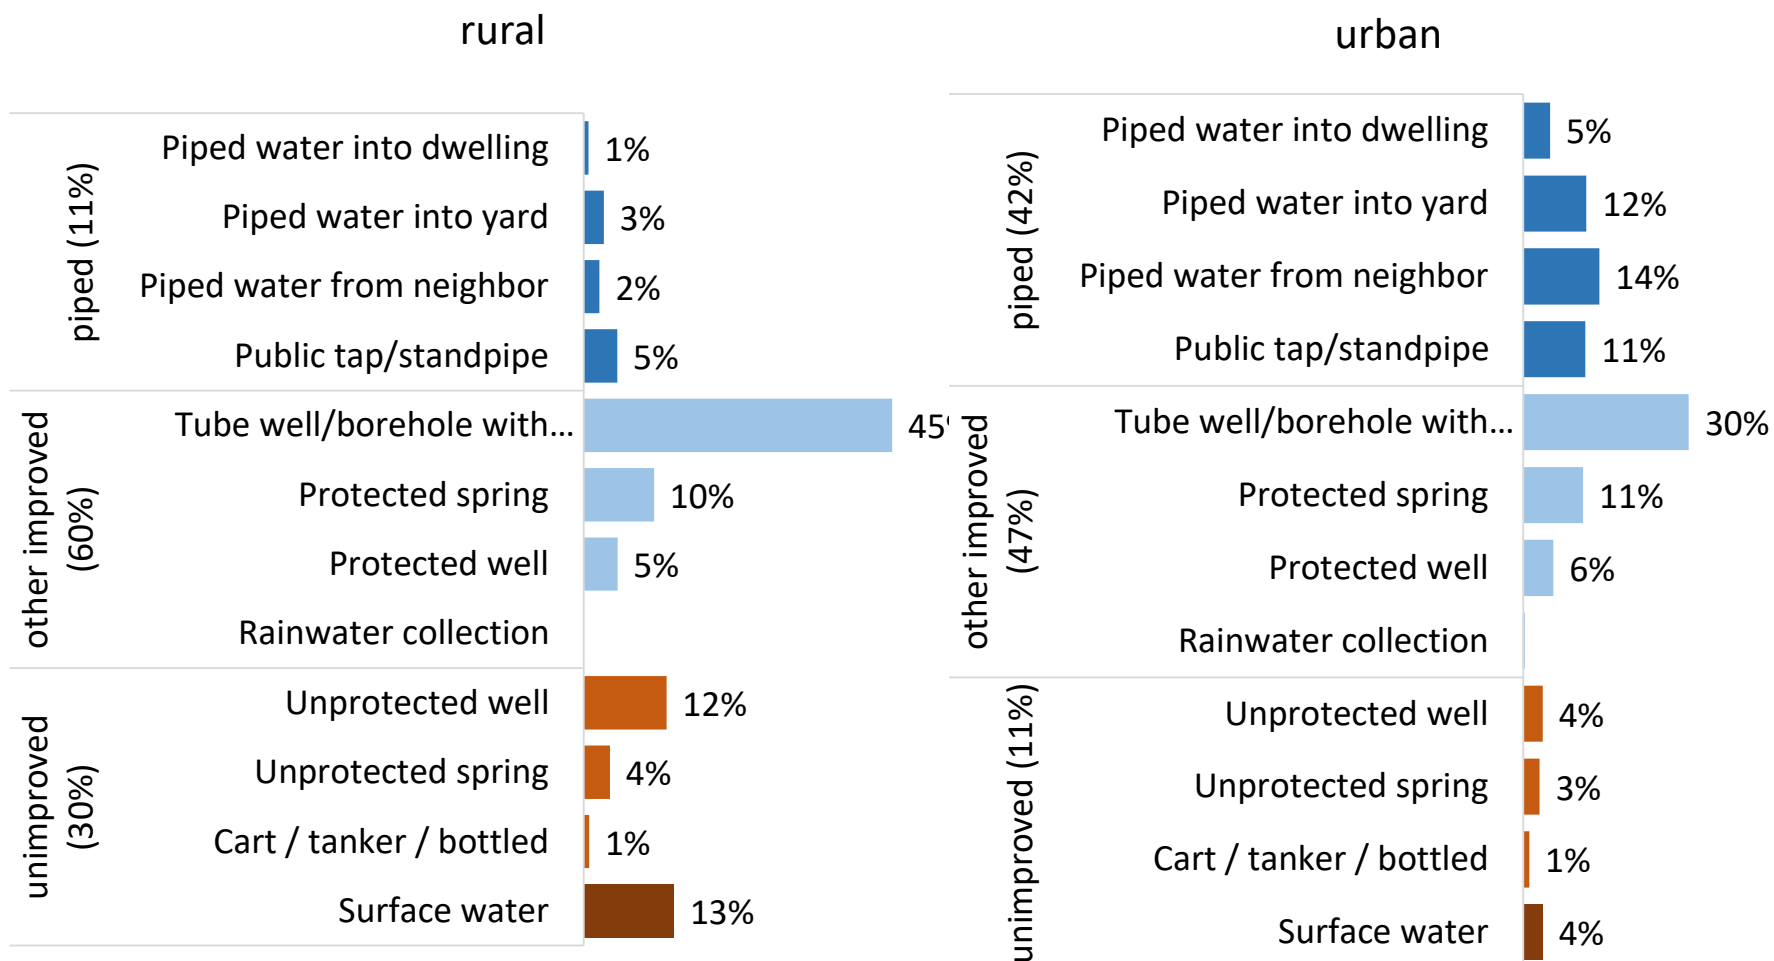

Figure 1: What is the main source of drinking-water for members of your household?

▶ **Source of data:** *Sauti za Wananchi* mobile phone survey, Round 11, June-July 2019  
 Base: all respondents; n=1,845

## Insight 1b. In both rural and urban areas, the most common water source is a borehole with pump

Figure 2: What is the main source of drinking-water for members of your household?

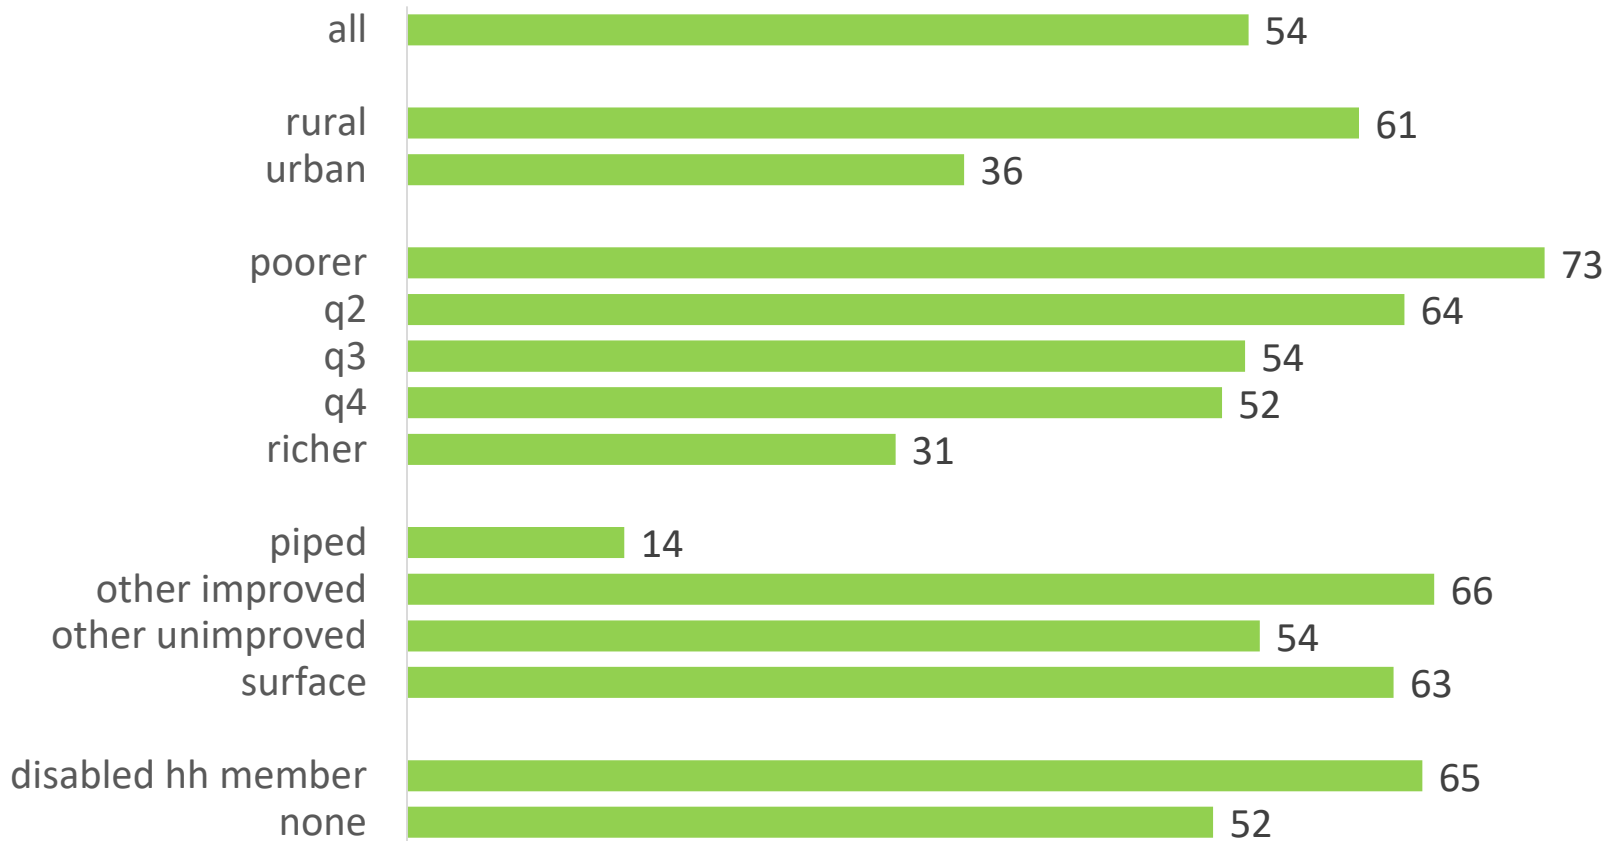

► **Source of data:** *Sauti za Wananchi* mobile phone survey, Round 11, June-July 2019

Base: all respondents; n=1,845

## Insight 2b. The average water collection time is 54 minutes with poorer and rural households experiencing longer than the average

---

Figure 4: Average collection time for drinking water (mins):

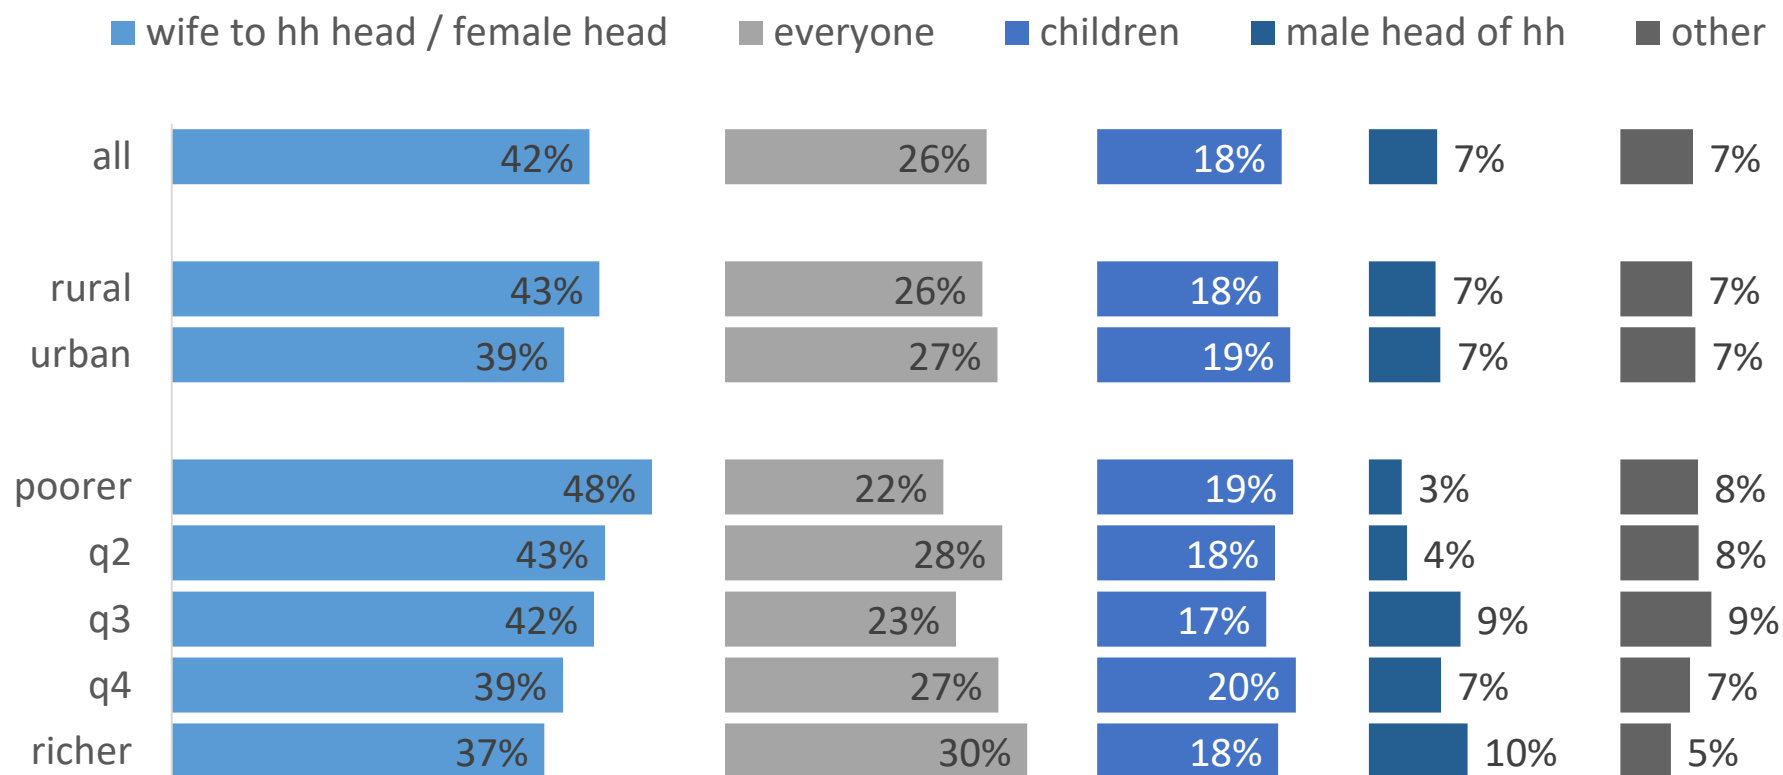

---

► **Source of data:** *Sauti za Wananchi* mobile phone survey, Round 11, June-July 2019  
Base: all respondents; n=1,845

## Insight 2c. The responsibility for collecting water is borne largely by women and children

Figure 5: Who in your household is the person responsible for collecting water

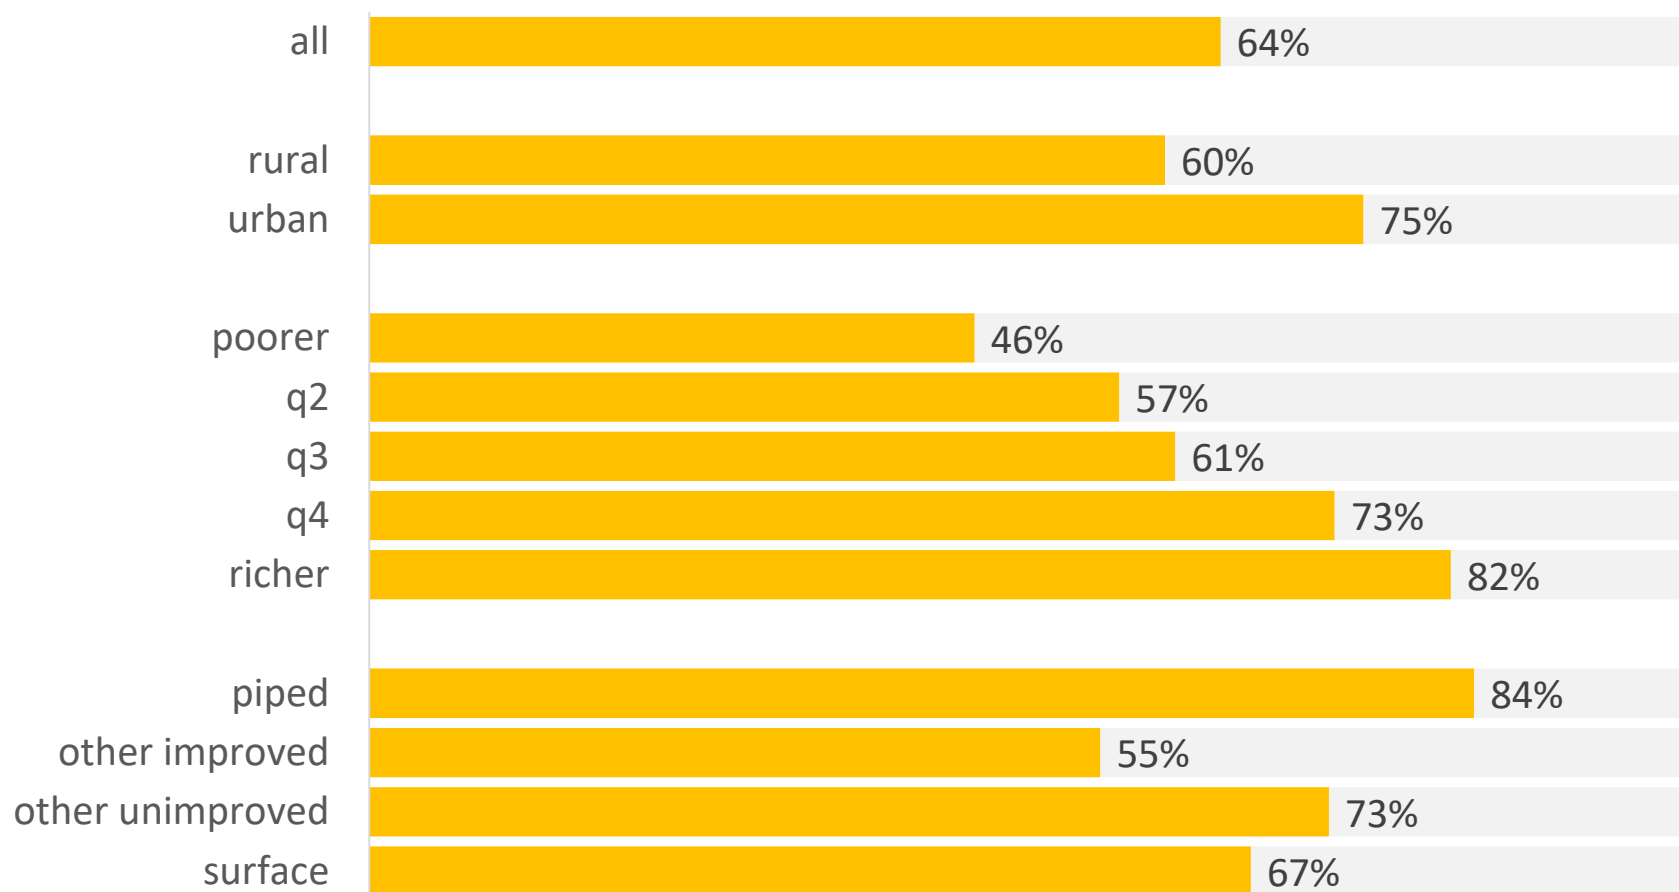

Source of data: *Sauti za Wananchi* mobile phone survey, Round 11, June-July 2019

Base: all respondents; n=1,845

## Insight 4. 2 out of 3 households treat their water to make it safer to drink

---

**Figure 7: Do you do anything to your water to make it safer to drink?**  
(% answering yes)

---

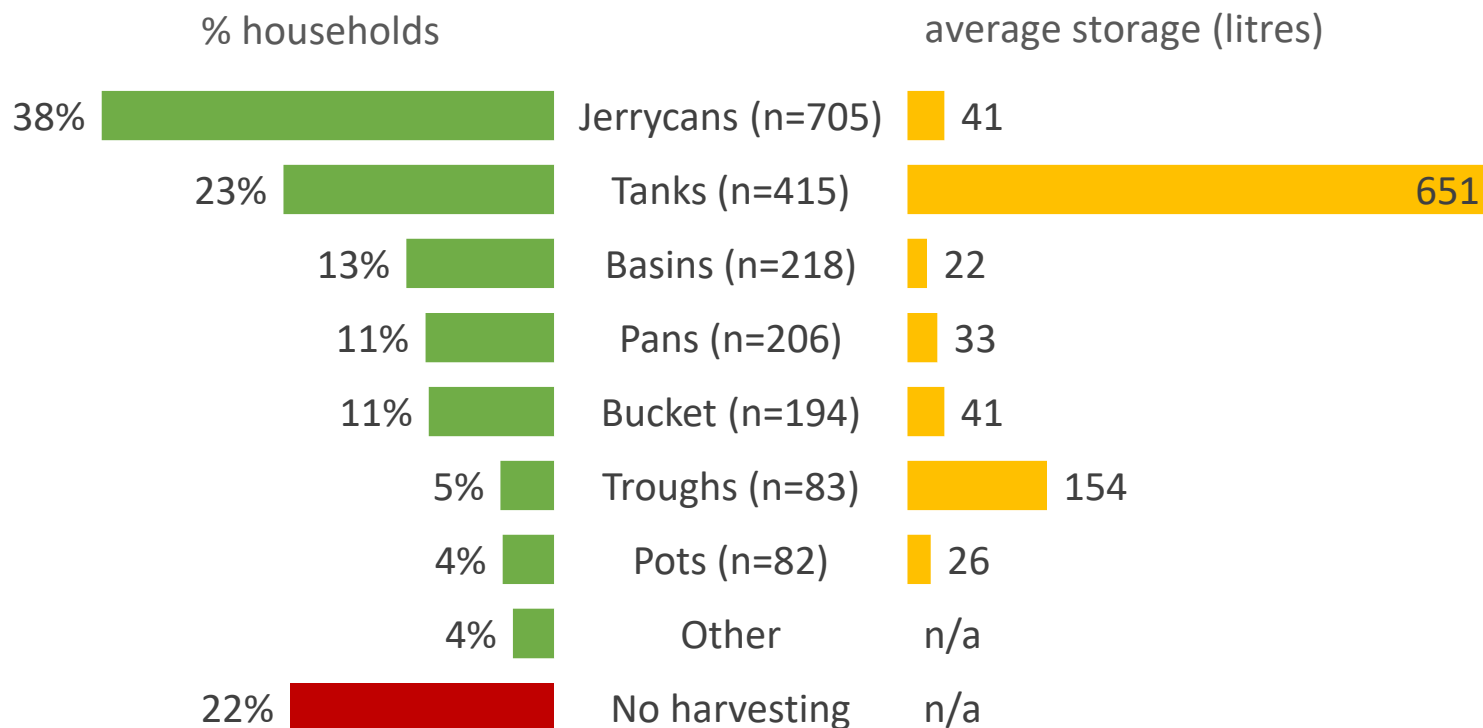

► **Source of data:** *Sauti za Wananchi* mobile phone survey, Round 11, June-July 2019  
Base: all respondents; n=1,845

## Insight 3. 8 out of 10 households harvest rain water

---

**Figure 6: % of households using the following to store rainwater, and average size of storage available (litres):**

---

► **Source of data:** *Sauti za Wananchi* mobile phone survey, Round 11, June-July 2019  
Base: all respondents; n=1,845

# Data: *Sauti za Wananchi*

**Sauti za Wananchi**

## Round 8

24 June and 5 July,  
2019

1845 respondents  
Mobile phone

*Africa's first nationally-  
representative mobile  
phone survey*

# Baseline Survey

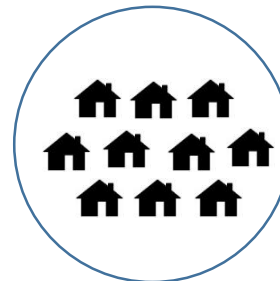

**79,303**  
Enumeration  
Areas

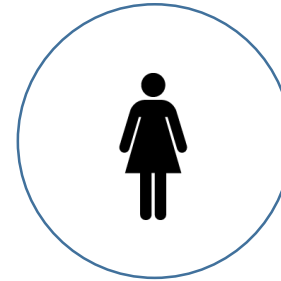

**200** Enumeration  
Areas

Around **100** are  
Households Listed /  
EA

**10** are  
Households selected

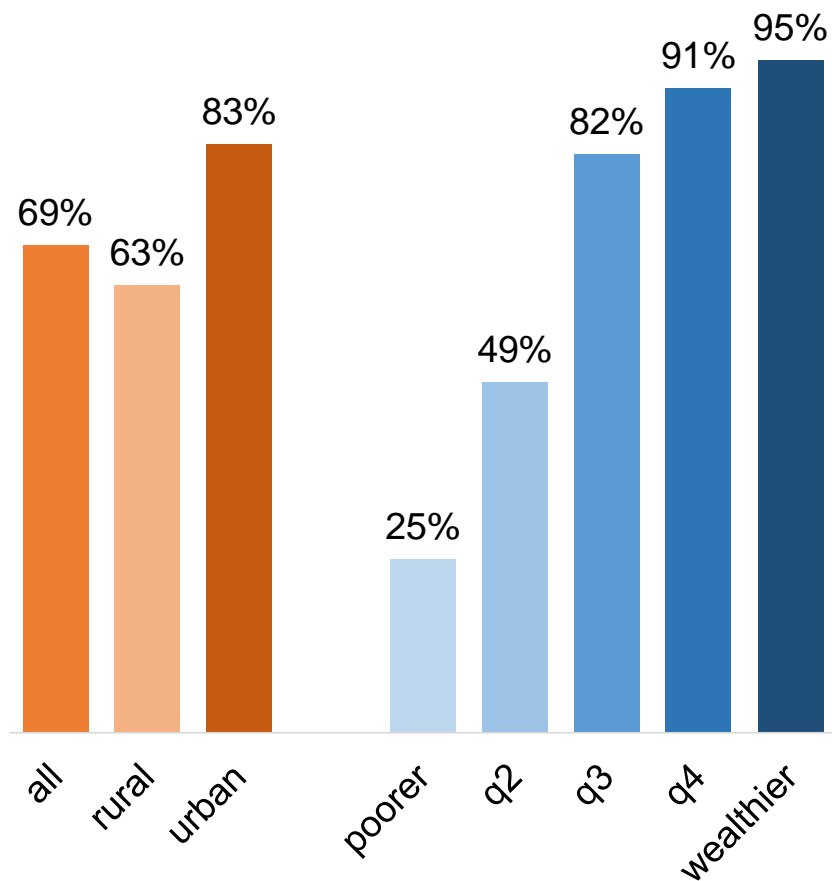

**1** Adult Household  
Member Selected

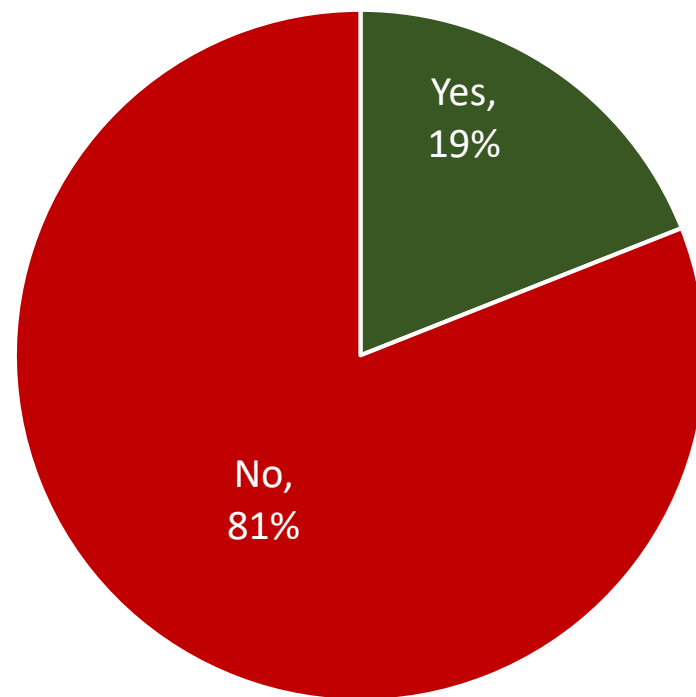

**1** Mobile phone and **1**  
Solar Charger are handed out

## Does your household own a mobile phone? (% answering yes)

## Access to electricity?

Source of data: *Sauti za Wananchi*, baseline survey, August-September 2017; n=2,000

# Sauti za Wananchi – Process Flow

Engagement

Official Public  
launch

Online publication of  
data, brief and questionnaire

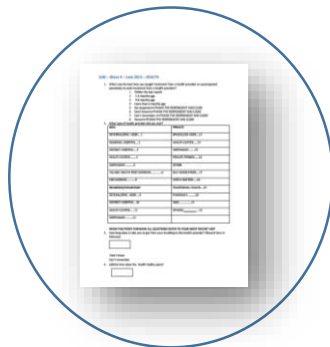

Targeted stakeholder  
outreach

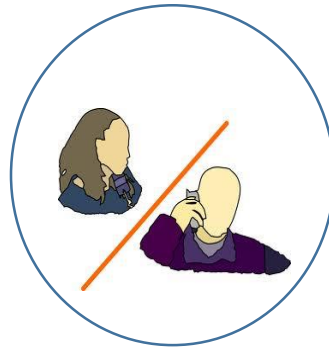

Phone Survey

What is going  
on in our  
communities?

We design a survey to capture  
citizens realities

Citizens are called and interviewed  
through call center

We clean and  
analysis the data

Report writing  
and Translation
