2.2 Payment by the Bank will be made only at the request of the Borrower and upon approval by the Bank in accordance with the terms and conditions of the Loan (or other financing) Agreement. The Loan (or other financing) Agreement prohibits a withdrawal from the loan account for the purpose of any payment to persons or entities, or for any import of goods, equipment or materials if such payment or import is prohibited by a decision of the United Nations Security Council taken under Chapter VII of the Charter of the United Nations. No party other than the Borrower shall derive any rights from the Loan (or other financing) Agreement or have any claim to the proceeds of the Loan (or other financing).

Bidders submitting Bids electronically shall follow the electronic Bid submission procedures specified **in the BDS**.

- 23.2 The Employer may, at its discretion, extend the deadline for the submission of Bids by amending the bidding document in accordance with ITB 9, in which case all rights and obligations of the Employer and Bidders previously subject to the deadline shall

25.1 A Bidder may withdraw, substitute, or modify its Bid after it has been submitted by sending a written notice, duly signed by an authorized representative, and shall include a copy of the authorization (the power of attorney) in accordance with ITB 21.3, (except that withdrawal notices do not require copies). The corresponding substitution or modification of the Bid must accompany the respective written notice. All notices must be:

- (a) prepared and submitted in accordance with ITB 21 and ITB 22 (except that withdrawal notices do not require copies), and in addition, the respective envelopes shall be clearly marked “WITHDRAWAL,” “SUBSTITUTION,” or “MODIFICATION;” and

26. Bid Opening

26.1 Except as in the cases specified in ITB 23 and ITB 25.2, the Employer shall, at the Bid opening, publicly open and read out all Bids received by the deadline at the date, time and place specified **in the BDS** in the presence of Bidders’ designated representatives and anyone who choose to attend. Any specific electronic Bid opening procedures required if electronic bidding is permitted in accordance with ITB 23.1, shall be as specified **in the BDS**.

26.2 First, envelopes marked “WITHDRAWAL” shall be opened and read out and the envelope with the corresponding Bid shall not be opened, but returned to the Bidder. If the withdrawal envelope does not contain a copy of the “power of attorney” confirming the signature as a person duly authorized to sign on behalf of the Bidder, the corresponding Bid will be opened. E. Evaluation and Comparison of Bids

- 27. Confidentiality** 27.1 Information relating to the evaluation of Bids and recommendation of contract award, shall not be disclosed to Bidders or any other persons not officially concerned with the Bidding process until information on the Intention to Award the Contract is transmitted to all Bidders in accordance with ITB 41.
- 27.2 Any effort by a Bidder to influence the Employer in the evaluation or contract award decisions may result in the rejection of its Bid.
- 27.3 Notwithstanding ITB 27.2, from the time of Bid opening to the time of Contract Award, if any Bidder wishes to contact the Employer on any matter related to the Bidding process, it should do so in writing.
- 28. Clarification of Bids** 28.1 To assist in the examination, evaluation, and comparison of Bids, and qualification of the Bidders, the Employer may, at the Employer's discretion, ask any Bidder for clarification of its Bid including breakdowns of the prices in the Activity Schedule, and other information that the Employer may require. Any clarification submitted by a Bidder in respect to its Bid and that is not in response to a request by the Employer shall not be considered. The Employer's request for clarification and the response shall be in writing. No change, including any voluntary increase or decrease, in the prices or substance of the Bid shall be sought, offered, or permitted, except to confirm the correction of arithmetic errors discovered by the Employer in the evaluation of the Bids, in accordance with ITB 32.
- 28.2 If a Bidder does not provide clarifications of its Bid by the date and time set in the Employer's request for clarification, its Bid may be rejected.
- 29. Deviations, Reservations, and Omissions** 29.1 During the evaluation of Bids, the following definitions apply:
- (a) "Deviation" is a departure from the requirements specified in the bidding document;
 - (b) "Reservation" is the setting of limiting conditions or withholding from complete acceptance of the requirements specified in the bidding document; and
 - (c) "Omission" is the failure to submit part or all of the information or documentation required in the bidding document.
- 30. Determination of Responsiveness** 30.1 The Employer's determination of a Bid's responsiveness is to be based on the contents of the Bid itself, as defined in ITB 12.
- 30.2 A substantially responsive Bid is one that meets the requirements of

the bidding document without material deviation, reservation, or omission. A material deviation, reservation, or omission is one that:

- (a) if accepted, would:
 - (i) affect in any substantial way the scope, quality, or performance of the Non-Consulting Services specified in the Contract; or
 - (ii) limit in any substantial way, inconsistent with the bidding document, the Employer's rights or the Bidder's obligations under the Contract; or
- (b) if rectified, would unfairly affect the competitive position of other Bidders presenting substantially responsive Bids.

30.3 The Employer shall examine the technical aspects of the Bid submitted in accordance with ITB 17 and ITB 18, in particular, to confirm that all requirements of Section VII, Employer's Requirements have been met without any material deviation or reservation, or omission.

30.4 If a Bid is not substantially responsive to the requirements of bidding document, it shall be rejected by the Employer and may not subsequently be made responsive by correction of the material deviation, reservation, or omission.

31. Nonconformities, Errors and Omissions

31.1 Provided that a Bid is substantially responsive, the Employer may waive any nonconformities in the Bid.

31.2 Provided that a Bid is substantially responsive, the Employer may request that the Bidder submit the necessary information or documentation, within a reasonable period of time, to rectify nonmaterial nonconformities or omissions in the Bid related to documentation requirements. Requesting information or documentation on such nonconformities shall not be related to any aspect of the price of the Bid. Failure of the Bidder to comply with the request may result in the rejection of its Bid.

31.3 Provided that a Bid is substantially responsive, the Employer shall rectify quantifiable nonmaterial nonconformities related to the Bid Price. To this effect, the Bid Price shall be adjusted, for comparison purposes only, to reflect the price of a missing or non-conforming item or component by adding the average price of the item or component quoted by substantially responsive Bidders. If the price of the item or component cannot be derived from the price of other substantially responsive Bids, the Employer shall use its best estimate.

- 32. Correction of Arithmetical Errors**
- 32.1 Provided that the Bid is substantially responsive, the Employer shall correct arithmetical errors on the following basis:
- (a) if there is a discrepancy between the unit price and the line item total that is obtained by multiplying the unit price by the quantity, the unit price shall prevail and the line item total shall be corrected, unless in the opinion of the Employer there is an obvious misplacement of the decimal point in the unit price, in which case the line item total as quoted shall govern and the unit price shall be corrected;
 - (b) if there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail and the total shall be corrected; and
 - (c) if there is a discrepancy between words and figures, the amount in words shall prevail, unless the amount expressed in words is related to an arithmetic error, in which case the amount in figures shall prevail subject to (a) and (b) above.
- 32.2 Bidders shall be requested to accept correction of arithmetical errors. Failure to accept the correction in accordance with ITB 32.1, shall result in the rejection of the Bid.
- 33. Conversion to Single Currency**
- 33.1 For evaluation and comparison purposes, the currency(ies) of the Bid shall be converted in a single currency as specified **in the BDS**.
- 34. Margin of Preference**
- 34.1 A margin of preference shall not apply.
- 35. Evaluation of Bids**
- 35.1 The Employer shall use the criteria and methodologies listed in this ITB and Section III, Evaluation and Qualification Criteria. No other evaluation criteria or methodologies shall be permitted. By applying the criteria and methodologies, the Employer shall determine the Most Advantageous Bid. This is the Bid of the Bidder that meets the qualification criteria and whose Bid has been determined to be:
- (a) substantially responsive to the bidding document; and
 - (b) the lowest evaluated cost.
- 35.2 In evaluating the Bids, the Employer will determine for each Bid the evaluated Bid cost by adjusting the Bid price as follows:
- (a) price adjustment for correction of arithmetic errors in accordance with ITB 32.1;
 - (b) price adjustment due to discounts offered in accordance with

ITB 15.4;

- (c) converting the amount resulting from applying (a) and (b) above, if relevant, to a single currency in accordance with ITB 33;
- (d) price adjustment due to quantifiable nonmaterial nonconformities in accordance with ITB 31.3;
- (e) excluding provisional sums and the provision, if any, for contingencies in the Activity Schedule but including Daywork, when requested in the Specifications (or Terms of Reference); and
- (f) the additional evaluation factors are specified in Section III, Evaluation and Qualification Criteria.

35.3 The estimated effect of the price adjustment provisions of the Conditions of Contract, applied over the period of execution of the Contract, shall not be taken into account in Bid evaluation.

35.4 If this bidding document allows Bidders to quote separate prices for different lots (contracts), the methodology to determine the lowest evaluated cost of the lot (contract) combinations, including any discounts offered in the Letter of Bid, is specified in Section III, Evaluation and Qualification Criteria.

36. Comparison of Bids

36.1 The Employer shall compare the evaluated costs of all substantially responsive Bids established in accordance with ITB 35.2 to determine the Bid that has the lowest evaluated cost.

37. Abnormally Low Bids

37.1 An Abnormally Low Bid is one where the Bid price, in combination with other constituent elements of the Bid, appears unreasonably low to the extent that the Bid price raises material concerns as to the capability of the Bidder to perform the Contract for the offered Bid price.

37.2 In the event of identification of a potentially Abnormally Low Bid, the Employer shall seek written clarifications from the Bidder, including detailed price analyses of its Bid price in relation to the subject matter of the contract, scope, proposed methodology, schedule, allocation of risks and responsibilities and any other requirements of the bidding document.

37.3 After evaluation of the price analyses, in the event that the Employer determines that the Bidder has failed to demonstrate its capability to perform the Contract for the offered Bid Price, the Employer shall reject the Bid.

- 38. Qualification of the Bidder**
- 38.1 The Employer shall determine to its satisfaction whether the Bidder that is selected as having submitted the lowest evaluated cost and substantially responsive Bid is eligible and meets the qualifying criteria specified in Section III, Evaluation and Qualification Criteria.
- 38.2 The determination shall be based upon an examination of the documentary evidence of the Bidder's qualifications submitted by the Bidder, pursuant to ITB 18. The determination shall not take into consideration the qualifications of other firms such as the Bidder's subsidiaries, parent entities, affiliates, subcontractors or any other firm(s) different from the Bidder that submitted the Bid.
- 38.3 An affirmative determination shall be a prerequisite for award of the Contract to the Bidder. A negative determination shall result in disqualification of the Bid, in which event the Employer shall proceed to the Bidder who offers a substantially responsive Bid with the next lowest evaluated cost to make a similar determination of that Bidder's qualifications to perform satisfactorily.
- 39. Employer's Right to Accept Any Bid, and to Reject Any or All Bids**
- 39.1 The Employer reserves the right to accept or reject any Bid, and to annul the Bidding process and reject all Bids at any time prior to Contract Award, without thereby incurring any liability to Bidders. In case of annulment, all Bids submitted and specifically, Bid securities, shall be promptly returned to the Bidders.
- 40. Standstill Period**
- 40.1 The Contract shall not be awarded earlier than the expiry of the Standstill Period. The Standstill Period shall be ten (10) Business Days unless extended in accordance with ITB 44. The Standstill Period commences the day after the date the Employer has transmitted to each Bidder the Notification of Intention to Award the Contract. Where only one Bid is submitted, or if this contract is in response to an emergency situation recognized by the Bank, the Standstill Period shall not apply
- 41. Notification of Intention to Award**
- 41.1 The Employer shall send to each Bidder, the Notification of Intention to Award the Contract to the successful Bidder. The Notification of Intention to Award shall contain, at a minimum, the following information:
- (a) the name and address of the Bidder submitting the successful Bid;
 - (b) the Contract price of the successful Bid;

- (e) the expiry date of the Standstill Period; and
- (f) instructions on how to request a debriefing or submit a complaint during the standstill period.

F. Award of Contract

42. Award Criteria

- (a) substantially responsive to the bidding document; and

43. Notification of Award

43.1 Prior to the date of expiry of the Bid validity and upon expiry of the Standstill Period, specified in ITB 40.1, or any extension thereof, and, upon satisfactorily addressing any complaint that has been filed within the Standstill Period, the Employer shall notify the successful Bidder, in writing, that its Bid has been accepted. The notification of award (hereinafter and in the Conditions of Contract and Contract Forms called the "Letter of Acceptance") shall specify the sum that the Employer will pay the Service Provider in consideration of the execution of the Contract (hereinafter and in the Conditions of Contract and Contract Forms called "the Contract Price").

The Employer shall provide a debriefing to all unsuccessful Bidders whose request is received within this deadline.

44.2 Where a request for debriefing is received within the deadline, the Employer shall provide a debriefing within five (5) Business Days, unless the Employer decides, for justifiable reasons, to provide the debriefing outside this timeframe. In that case, the standstill period shall automatically be extended until five (5) Business Days after such debriefing is provided. If more than one debriefing is so delayed, the standstill period shall not end earlier than five (5) Business Days after the last debriefing takes place. The Employer shall promptly inform, by the quickest means available, all Bidders of the extended standstill period.

44.3 Where a request for debriefing is received by the Employer later than the three (3)-Business Day deadline, the Employer should provide the debriefing as soon as practicable, and normally no later than fifteen (15) Business Days from the date of publication of Public Notice of Award of contract. A foreign institution providing a bond shall have a correspondent financial institution located in the Employer's Country, unless the Employer has agreed in writing that a correspondent financial institution is not required.
- 46.2 Failure of the successful Bidder to submit the above-mentioned Performance Security or sign the Contract shall constitute sufficient grounds for the annulment of the award and forfeiture of the Bid Security. In that event the Employer may award the Contract to the Bidder offering the next Most Advantageous Bid.
- 47. Adjudicator**
- 47.1 The Employer proposes the person named **in the BDS** to be appointed as Adjudicator under the Contract, at an hourly fee specified **in the BDS**, plus reimbursable expenses. All civil works, materials, shall be done in accordance with the relevant clauses of the most recent edition of the ISO, British Standard [BS] and UNBS standards.

PIPEWORKS

Excavation, Bedding, Backfilling, Reinstatement

Excavation of pipe trenches shall follow the details provided by the contract manager or supervising engineer of the employer.

Excavation work shall include the removal and subsequent handling of all materials excavated or otherwise removed in performance of the contract work, regardless of the type, character, composition, or condition thereof. All such work shall be done under strict measures of safety for workmen and for all kinds of property and installations.

Dimension of Trenches

Unless specified by supervising engineer or contract manager, the trenches for pipe work shall be excavated as open-cut trenches with the following minimum dimensions: Width 600mmX depth 1500mm

Bedding

Pipes generally shall be laid on solid soil, the trench bottom shaped to accommodate 1/3 of the pipe circumference.

Excavation for Chambers and Manholes

The free space between the chamber/manhole and the sidewall of the excavation shall be 50 cm or as specified by the supervising engineer/ contract manager. The exact height of the excavations for the manholes shall be adjusted according to elevations of the existing pipelines. The bedding of manholes has to be done according to the drawings or according to European Standards or equivalent, using concrete blinding C10 or similar.

Backfilling

Backfilling shall be done with excavated material. The additional soil that comes from the excavation shall be removed from the site and transported to its final storage. These costs have to be included in the unit prices.

Backfill material shall be evenly graded and not include constituents exceeding 50mm or any clay or organic material. In the case of structures, the maximum size of constituents shall not exceed 30 mm. All backfill material shall be approved by the Engineer.

Backfilling shall be done in layers not exceeding 200mm thick if done manually or 300mm if done by machinery.

The compaction shall be done by rollers, compactors, vibrators or other manual means as approved by the Engineer.

The Contractor shall monitor the backfill and shall ensure that at all times during, and at the end of the period of maintenance all finished levels are in accordance with those specified by the contract manager or supervising engineer.

Reinstatement of Surfaces

All surfaces of roads, driveways and foot-paths, etc., whether public or private that are disturbed during execution of the works, shall be reinstated by the Contractor. Trenches, channels, drainage ditches, kerbs shall be reinstated to the condition in which they were before execution of the works. Road surfaces shall be reinstated to at least the previous condition.

Dewatering

All excavations shall be kept free of water at all times during the construction of the Works. The Contractor shall carry out all dewatering, groundwater lowering, pumping, temporary drainage, etc., which may be necessary for the purpose of removing water from the excavations.

Regular Excavation

Regular excavation means that all the excavations of soil, clay, river sediments and similar materials. The excavation of such materials shall be by hand or excavator. It also includes excavation of materials containing fieldstones and blocks which are not joined. The volume of such fieldstones and blocks must be smaller than 0.75 m³. Materials exceeding this size shall be broken. The excavation of

solid and compact material as soft rock and bound gravel is considered as regular excavation. The Contractor shall bear in mind that existing leakages might form a special water / soil mix and consider this in his unit prices.

The excavated earth shall be piled on site for reuse. The piles shall not hinder the ongoing works.

Rock excavation

Rock excavation shall include all solid rock in place and all boulders or detached pieces of solid rock more than 0.75m³ in volume.

Any rock or any other hard material encountered in excavating to the required depths which in the opinion of the Engineer can be removed by wedges, compressed air or other special plant or explosive shall be paid for as rock and price shall include for trimming and levelling. No blasting will be allowed without prior permission of the Engineer. Materials which can be removed by hand pick or excavator, ripper or similar mechanical plant will not be classified as rock.

Handling of Materials

The Contractor shall ensure that during transport, handling and storage, each item (pipe and fitting) is free from damage prior to installation. Damaged pipes and fittings shall be discarded. The protection of the pipe ends is particularly important. Pipes and fittings shall never be dropped to the ground. They shall be unloaded from the transport either by hand or using slings and lifting equipment.

Where needed, pipes shall be cut by an approved method which provides a clean square cut of the pipe and lining (if applicable) without damage. All cut or trimmed ends shall be cleaned before the pipes are laid.

Laying of pipes General

Pipes and fittings shall be installed in strict accordance with the instructions from the contract manager/ supervising engineer and to the satisfaction and approval of the Engineer.

The pipe route shall be laid as indicated in the drawing of the Contractor unless instructed by the Engineer. The drawings shall show the approximate lines and levels to which the pipeline is to be built and are subject to amendments by the Engineer.

All pipes, curves, bends and other specials shall be laid accurately in accordance with the alignment, levels and gradients so determined, so that the top of the pipe is not less than the minimum specified depth below the finished ground level along the pipeline. Changes in gradient will be the minimum necessary to secure efficient operation and economy in excavation.

The finished pipeline shall run straight between bends or curves, and a uniform bearing throughout the entire length of pipe shall be provided. The Contractor shall inform the Engineer sufficiently in advance when the formation levels of the trenches are ready for inspection.

As a general rule, water pipes and sewers shall not be laid in the same trench. They shall be laid in separate trenches with sufficient horizontal and vertical distance between them. Where a sufficient horizontal and vertical separation cannot be obtained, concrete encasement shall be provided to sewer.

The pipe shall be positioned and bedded in the trenches in an approved manner and properly aligned. Before being positioned, each pipe shall be thoroughly examined to ensure that it is free from defects and shall have all dirt removed from the inside thereof. The Contractor shall cut the pipes if and where needed to the required length and shall thread, chamfer or bevel the cut ends of pipes as the case may be and shall supply and install all fittings, specials and adapters as maybe necessary for the proper execution of the works and shall joint the pipes in accordance with the Specifications and to the Engineer's satisfaction.

The pipes shall be cleaned ahead of lowering into the trench and care shall be taken that no soil, dirt or debris remains in the pipe after laying. At work interruptions, the pipe ends shall be closed by plugs or other approved means.

No pipes shall be laid into loose or uncompacted soil, muddy soil, or untrimmed trench bottom. Good alignment shall be preserved in laying. The deflections at joints shall not exceed that recommended by the manufacturer. Fittings, in addition to those shown on the drawings, shall be provided.

It shall be the Contractor's responsibility to safeguard by means of temporary or permanent support or otherwise all pipes, structures and other items which would be liable to suffer damage as a result of his work, if such precautionary measures were not taken.

Any injury to the protective coating of the pipes from any causes during the construction of the pipeline shall be repaired by the Contractor at his own expense to the satisfaction of the Engineer.

At the end of each day's work, a strong watertight plug or other approved means shall be firmly fixed in each open end in order to exclude all foreign materials.

The Contractor shall provide all skilled and un-skilled labor to complete the installation of all pipelines included under the Contract.

Laying of HDPE pipes

Laying of HDPPE pipes shall be done in moderate bends or snaking to accommodate any contraction resulting from cooling prior to backfill.

To reduce tension stress due to thermal contraction pipes shall be allowed to cool in the trench before backfill. To minimize the development of pull-out stresses at rigid connections, such as service tees and meters, pipe shall be trimmed to required length and connected to rigidly held fittings only after it has cooled substantially close to the trench temperature.

For installation of PE pipes from coils the necessary pulling tools have to be provided by the contractor.

Jointing of PE pipes

HDPE pipes shall be jointed through mechanical pipe connectors (compression couplings). When using pipe connectors the instruction of the manufacturer has to be followed strictly. Special care has to be taken that the gasket is not pushed out of the connection while inserting the pipe.

Installation of Fittings, Armatures and Appurtenances

All valves shall be placed in lockable manhole chambers. Valves shall be installed according to the provided drawings and shall also include the construction of the necessary concrete support blocks in the chambers.

The area around the underground installation equipment shall be carefully compacted to avoid later settlement.

All pipe fittings, such as tees, bends and plugs shall comply with the dimensions of the line in which they are to be used.

Crossings with Existing Mains

The Contractor shall investigate all services, which may interfere with the pipe alignment and seek assistance from the employer. This refers to all possible crossings as existing water and sewer pipes, electric cables and telecommunication cables. The contractor carries out the works at his own risk. Damaged pipes and cables needs to be fixed immediately by the contractor and on his own expenses.

Installation of Water Meters

Water meters shall be installed according to the Manufacturer's specifications.

The installation of water meters shall include the mounting of the water meter and connection to the pipe.

The water meter installation has to be accepted by the Engineer e.g. no leakage, readable, sealed and delivery of required documentation.

Air Release Valves

They will be installed at every section as required.

Valve Chambers

Precast concrete, in-situ concrete, blockwork or brickwork may be used subject to approval. The construction of the chamber shall be as per the drawing. The chamber must be of that size that it is possible to replace the valve without destroying the chamber. The bidder shall supply the materials for the construction

Completion of the Floors

The floors shall be done in concrete, except when stated otherwise in the drawings. Levelling shall be done only by steel trowel to falls indicated in the drawing. In case of partial repairing, the damaged parts shall be cut carefully with an angle of 90°, cleaned and refilled.

Manhole Cover

Valve chambers when installed shall be covered with approved heavy-duty metal surface covers, Class D400. The manhole cover must be lockable. In some cases, reinforced concrete covers will be required. The bidder shall supply the materials for the construction

Concrete Anchor / Thrust Blocks

The Contractor shall construct all thrust blocks and collars (end caps) at all bends, tees, tapers, valves, and dead-ends etc. unless otherwise shown on the drawings. Thrust collars shall be constructed at plugged dead-end pipes with push-on joints (EU-piece and X-piece, or F-piece and X-piece if required).

Thrust blocks and collars shall be constructed of in-situ concrete in accordance with the specifications provided below under concrete works. The bearing faces of the thrust blocks shall be placed against undisturbed natural earth, except as specified below.

Thrust forces and siting of anchor blocks shall conform to the field test pressure and be calculated by the Contractor considering the prevailing soil bearing capacity. Dimensions given on the standard drawings are approximate only. All concrete thrust blocks and collars shall be allowed to cure for at least 7 days before backfilling the thrust blocks and before any loads are applied.

In concrete manholes, thrust forces from bends or from closed valves shall be transmitted to the concrete walls by means of puddle flanges. Additional structural reinforcements are to be provided by the Contractor where necessary. The bidder shall supply the materials for the construction.

Testing and Inspection of Material and Completed Works

Tests to be performed:

- 1) The tests to works carried out and installations made may be ordered by the Engineer in order to assure the necessary quality control. The number of tests shall be as specified by the Engineer. The Contractor shall make available all the necessary means to the Engineer and his representative as required. The tests, which may be required, are:
- 2) Concrete test: Slump test, Cone test, Consistency tests and Concrete cube tests
- 3) Cement tests
- 4) Tests of aggregates: Particle grading, chemical analyses, Compression, coefficient of expansion and shear.

- 5) Water tests: dissolved salts, Sulphate presence, Chlorine, Organic matter and other impurities
- 6) Mechanical tests: Quality of ready-made equipment

- 8) Operation tests and commissioning of main components of Works (e.g. submersible pump, generator,)
- 9) Installed valves and appurtenances
- 10) Compaction Tests
- 11) Disinfection of pipelines

Pressure tests

After pipe laying, casting of concrete structures on the line and partial backfill have been completed, the line shall be subjected to a hydrostatic pressure test. The line shall be tested over its entire length or, in the case of long lines, in sections.

Disinfection of Pipelines

After the lines have been hydraulically tested and before they are put into service, they are to be flushed with clean water to remove foreign matter and then sterilized.

Training of Operators

After completion of works on each site, the contractor will conduct a training of up to 6 No scheme operators on operation and maintenance of installed facilities.

ARTICLE 1- GENERAL

1.1 Documents Comprising the Performance Incentive Compensation Appendix

The Performance Incentive Compensation Appendix consists of:

- (a) the Performance Incentive Compensation Appendix Provisions;
- (b) Attachment #1 Incentive Compensation Calculation Procedure Notes; and
- (c) Attachment #2 Incentive Compensation Charts 1-[].

ARTICLE 2- THE PERFORMANCE INCENTIVE COMPENSATION

2.1 Performance Incentive Compensation Limits

(1) The Performance Incentive Compensation paid to the Service Provider shall not exceed the equivalent of \$[] U.S. over the term of the Contract.

(2) The actual amount paid to the service Provider as Performance Incentive Compensation shall be determined by the extent to which the Service Provider achieves the performance criteria set out in the Incentive Compensation Charts and by the application of the calculations set out in the Incentive Calculation Procedure Notes for the applicable Contract Year.

(3) If the Service Provider fails to meet the “Excellent” rating set out in the Incentive Compensation Chart, in any Contract Year, the Service Provider will be obliged to make up the shortfall in the subsequent Contract Year, as well as meet the performance targets for that Contract Year.

(4) Except as the Employer may, in its sole discretion, otherwise determine based on exceptional circumstances, if the Service Provider fails to attain the Maximum Annual Incentive Compensation in any Contract Year, the shortfall will not be available to the Service Provider in the subsequent Contract Years and the equivalent of \$[] U.S. per Contract Year maximum will not be increased.

(5) For the purpose of calculating the equivalency of \$[] U.S. and \$[] U.S. pursuant to Sections 2.1(1) and 2.1(2) of this Performance Incentive Compensation Appendix, the equivalency shall be calculated as of the date of payment of the Performance Incentive Compensation.

**ATTACHMENT # 1 – APPENDIX G
INCENTIVE COMPENSATION CALCULATION PROCEDURE NOTES**

[SAMPLE: This part is to be designed on a case by case approach]

**PART A THE METHOD FOR CALCULATING PERFORMANCE INCENTIVE
COMPENSATION IN EACH CONTRACT YEAR**

I. The Performance Incentive Compensation for each Contract Year shall be calculated as follows:

$$\text{Compensation} = \text{Composite Score} \times 0.2 \times \text{Maximum Annual Incentive Compensation}$$

Where:

- (i) The Maximum Annual Incentive Compensation is calculated as set out in Section 2.1 of the Performance Incentive Compensation Appendix Provisions; and
- (ii) The Composite Score is calculated in accordance with “Part B-The Method for Calculating the Composite Score” of these Incentive Compensation Calculation Procedure Notes.

PART B THE METHOD FOR CALCULATING THE COMPOSITE SCORE

1. The Composite Score for each Contract Year shall be as follows:

Composite Score Total of All Weighted Scores **for the Performance Criteria**

Where:

- (i) The Weighted Score for each Performance Criterion equals Criterion Weight x Criterion Value;
- (ii) The Criterion Value is measured from “Excellent” to “Poor” with corresponding values of 5 (for “Excellent” performance) to 1 (for “Poor” performance) as set out in the Incentive Compensation Charts and evaluated based on the performance of the Service Provider;
- (iii) The Criterion Value which the Operator receives for any Performance Criterion is based upon the technical standards set out in the Incentive Compensation Charts under the headings, “Excellent”, “Very Good”, “Good”, “Fair”, and “Poor” as compared against the Operator’s actual technical standards in each Contract Year; and
- (iv) If the Service Provider’s actual performance in a Contract Year,
 - (a) exceeds the technical standards for an “Excellent” Criterion Value, then the Criterion Value shall be 5;
 - (b) is less than the technical standards for a “Poor” Criterion Value, then the Criterion Value shall be zero; or

- (c) is in between the technical standards for two Criterion Values, then the Criterion Value shall be rounded down to the nearest whole number or 0.5 decimal point.
2. For the purpose of clarity, it is noted that there are only ten Criterion Values to be used as follows: 0, 1, 1.5, 2, 2.5, 3, 3.5, 4, 4.5 and 5.
 3. Notwithstanding paragraphs 1 and 2 above, with respect to the Performance Criterion relating to institutional improvements in Attachment #2 The Incentive Compensation Charts 1-8,
 - (a) if the Service Provider’s actual performance in a Contract Year is less than the technical standard for a “Fair” Criterion Value, then the Criterion Value shall be zero;
 - (b) for the purpose of clarity, it is noted that there are only three Criterion Values to be used as follows: 0, 2 and 5; and
 - (c) each of the documents or plans listed under the Performance Criterion shall be scored with the appropriate Criterion Value and a mean average score will be taken to calculate the Criterion Value for the Performance Criterion, which shall be rounded down to the nearest whole point or 0.5 decimal point.
 4. For ease of reference, the following calculation represents the calculation of the Composite Score for a hypothetical Service Provider for four performance criteria in one Contract Year.

Sample Incentive Compensation Chart

Performance Criterion		Units	Criterion Values				
			Weight				
			Excellent	Very Good	Good	Fair	Poor
1.	e.g. Electricity use [% reduction in kW. hr consumed from Base Year]	0.30	65	55	50	40	30
2.	[Criterion 2] []	0.25	20	19	17	16	15
3.	[Criterion 3] []	0.15	30	25	20	15	10
4.	[Criterion ~] []	0.30	90	85	80	75	70

The following table demonstrates the procedure for the calculation of the “**Composite Score**”, if at the end of the year the achievements of the Service Provider are as follows:

1.	[e.g. Electricity use]	57
2.	[Criterion 2]	22
3.	[Criterion 3]	29
4.	[Criterion 4]	69
